I have just recently graduated from Otago Polytechnic with a Bachelor in Information Technology. I also have experience with customer service and working with clients from previous jobs. I have previously helped teach a computers-basics class at East Otago High School, and studied all available Web Development papers at Otago Polytech.

Previous Experience

East Otago High School IT Night Classes

During my time at High School I helped organise and teach night classes for basic computer use. This position required good communication with class attendees who were new to operating a computer. It also required good organisation to make sure each class taught the appropriate material and to make sure the class's teacher and students knew where and when the classes took place.

Otago Polytechnic Web Development Papers

During my time at Otago Polytechnic I enrolled in all web development papers offered by the institution. I approached the papers with an enthusiastic attitude and enjoyed taking part in all classroom activities and assignments. I maintained an average A grade on these papers, and had my work and assignments used as demonstrations by the lecturer as examples of high quality work to be shown to other students.

Otago Polytechnic Capstone Project – Trade Me

In order to graduate with my Bachelor in Information Technology I took part in the capstone project at Otago Polytechnic building software for Trade Me. I developed a website used to demonstrate the potential of a new user-base to Trade Me, while also working closely with our clients and stakeholders. I learnt valuable skills in both front and back end development, client communication, project management, and software testing. I received very positive feedback from Trade Me for my work and an A- grade on the paper.

Training & Education

Otago Polytechnic

Bachelor in Information Technology
Dunedin
2012 - 2014

Otago Polytechnic

Certificate in Information Technology
Dunedin
2011

Aoraki Polytechnic

Certificate in Television Production
